To: Whom It May Concern

I am delighted to recommend Natnael Abay Akalu for the **global UGRAD program**. As a teacher, I've encountered a few remarkable students, and he is undoubtedly one of the most exceptional ones, with a keen interest in software development, mathematics, ability to work under high pressure and adjust to new environments smoothly.

Natnael and I initially met when he registered for the discrete Mathematics course, which I was teaching at the time. His excitement and commitment to hard work set him apart from the rest of his class, and he eventually finished the course with honors. I got the pleasure to teach him Software Engineering again in his third year of university and got to know him personally. That's when I saw his insights towards fixing problems in his community and the world in general, which is a desirable trait to have in an aspiring youth leader.

I am glad to recommend Natnael for admission to your program. As he is a remarkable student to teach and know, his vicious curiosity and skill for software engineering and math are undeniable. Which leads me to believe that he could be a perfect fit for your program.

Best Regards,

Dr. Venkateswarlu Sunkari
Assistant Professor
